

## **BEE KEEPING**

In this district flora is available through out the year , so , this belt is very suited for rearing of honey bees. About 130 bee keepers are rearing with 3207 colonies which are producing 400 qtl honey every year. Thus there is a still wide scope of bee keeping to increase its production to as high as 1280 qtl .Besides this activity is also very effective in generating employment for rural youth.
