

The Micro/ Drip Irrigation enhances irrigation & water use efficiency. It also enhances fertilizer use efficiency. By adopting this system we can save 60-65% water. Rs 50000/- is required per hectare to implement this scheme. To make this technique popular among farmers, subsidy @ 75% on actual cost of system is under consideration by the State Govt. It is proposed to cover 375 hectares during the 5 five years under Micro/ Drip Irrigation fore Horticulture and non horticulture crops . Total cost of system is Rs 187.50 lac. Farmers should be given subsidy @ 75%. The cost will be Rs 140.60 lac
