

Weather watch report on weekly basis

Weather is day to day and hour to hour changes in atmosphere. Which includes winds, lightly, storms, rain, hails and many more. Whereas climate is terms for averaging of atmospheric conditions over periods of. In order to enumerate all the weather conditions caused at weekly interval. State govt. has prepared weather watch report on weekly basis and further reported this Ministry of Agriculture & Farmers Welfare, GOI to describe the current weather status of Punjab state.

IMD is also providing district wise forecast/warning to Agroment field units located with PAU Ludhiana for carrying out weather based district advisories for farmers of Punjab.

In weather watch report, based on ADO's field reports on crop-wise progress of sowing, a consolidated report is being prepared in which they inform about the weekly area coverage/crop condition/input supply position/Fertilizer/ incidence of Pest & Disease /rainfall activity/ availability of fodder crops for cattle.
